Koch Membrane Systems to Launch Next Generation Dairy-Pro™ Sanitary Spiral Wound Elements at International Cheese Technology Exposition (ICTE)

New Element Makes Dairy Processing Safer and More Efficient

Wilmington, MA – April 11, 2016 - Koch Membrane Systems (KMS), a global leader in advanced membrane filtration technologies for the dairy industry, today announced it will launch its next generation Dairy-Pro Sanitary Spiral Wound Elements at the International Cheese Technology Exposition (ICTE), April 12-14 in Milwaukee, Wisconsin (booth 1149).

Dairy-Pro Sanitary, Spiral Wound Elements are designed specifically for the demands of the dairy industry. Their enhanced element construction improves energy efficiency up to 25 percent and increases productivity up to 15 percent over prior elements. An advanced blister resistant design decreases the risk of product contamination. Pressure capability up to 800 psi (55 bar) and clean in place temperature tolerance up to 60°C (140°F) reduce and operating costs and ease the cleaning process. All Dairy-Pro elements are USDA, FDA, 3A, EU, and Halal compliant.

“KMS has over 40 years of global experience applying membrane filtration to improve every step of dairy processing,” said Manny Singh, President, Koch Membrane Systems. “The Dairy-Pro product line is the latest example of our commitment to create value for our customers through technological innovation.”
